## Welcome to our 2021 Bull Sale

What a difference 12 months makes. 2021 sees the beef industry at record highs both in the weaner markets, for feeder cattle and on the processor girds for both surplus old stock and particularly MSA grass fed cattle. The return of a good season and grass in the north has seen unprecedented demand for cattle. The demand for Hereford cattle has been outstanding and we must continue to breed cattle that suit the particularly lucrative grass-fed market.

We strongly recommend this years offering to you. The performance data on our cattle continues to improve and is amongst the best in the breed. Going through the catalogue you will see a large number of shaded EBV's which represent traits in the top 10 – 20% of the breed. This year sees our largest offering of homozygous polled bulls – 67 in total.

All bulls have genomically enhanced EBV's and health protocols are at the highest level.

We are hopeful that all state borders are open in February and life is somewhat normal. We will be abiding by COVID-19 protocols that are current at the time. Videos of sale bulls will be available on our websites and also on the auctions plus website.

Our beef field days are on the 9th of February and are a great opportunity to preview our offering. Please contact us if you have any queries. We look forward to seeing you on the 22nd of February.

Regards,  
Lachy and Alastair

# Buyers Information

## Inspection

All cattle will be available for inspection from 11.00am on the morning of the Sale, however inspection can be arranged before hand by appointment.

## Luncheon

Will be available on the property.

## Delivery

While every care will be taken, no responsibility can be accepted whilst awaiting delivery.

## Transfers

Please indicate on the Buyers Instruction Slip if a transfer is required.

## Health

All cattle are officially government confirmed as TB free and Brucellosis free. The properties have a J-Bas 6 status for Bovine Johnes disease. All sale cattle treated with 7 in 1 (booster due Autumn 2021). All sale cattle treated with Dectomax, January 2021. All sale bulls ear notch tested as NOT persistently infected with the BVDV virus. All bulls have been vaccinated with Pestiguard and Vibrovax.

## Interstate Purchasers

The Vendor agrees to hold any stock for interstate buyers until any necessary tests have been completed. Expenses incurred payable by the Purchasers. Should any cattle react, the sale will be cancelled.

## Accommodation and Transport

The Auctioneers or vendors will be pleased to arrange accommodation in Adelaide or Bordertown.

## Buying Orders

The Auctioneer's Stud Stock staff are well acquainted with the herd. Buying orders will be diligently executed by officers experienced in stud beef cattle practice.

## Insurance

Can be arranged for transit and/or periods up to twelve (12) months cover.

## Rebate

A rebate of four percent (4%) will be paid to outside agents in attendance. A rebate of one percent (1%) will be paid to outside agents not in attendance but introducing client in writing prior to sale.

## COVID-19

Please be aware that we are obliged to abide by the current COVID-19 rules, regulations and restrictions on Sale day. Please take care.

## BUYER'S INSTRUCTION SLIP - see Page 76

# Breedplan Explanation

## EBV's are provided for the following traits:

<b>CE DIR</b>	Calving Ease Direct. Indicates how this animal influences the birth of its progeny. Positive EBV's indicate easier calving.
<b>CE DTRS</b>	Calving Ease Daughters. Indicates how well the animal produces daughters that have easier calving.
<b>GL</b>	Lower Gestation Length EBV's indicate easier calving and increased growth after birth.
<b>SS</b>	Scrotal size is an indicator of male fertility in regards to semen quality and quantity. SS is also positively associated with female fertility.
<b>Birth Weight</b>	The lower the birthweight EBV, the lighter is the birthweight potential of the progeny.
<b>Genetic Milk</b>	Reflects extra calf weight at weaning due to the genetic influence a sire has on his daughters milking and mothering ability.
<b>200 Day Weight</b>	Indicates the relative weight advantage of a sire at 8-10 months of age.
<b>400 Day Weight</b>	Indicates the relative weight advantage of a sire at yearling age.
<b>600 Day Weight</b>	The best single estimate of an animals genetic merit for growth beyond yearling age.
<b>MWT</b>	Mature Cow Weight is an estimate of the genetic difference in cow weight at 5 years of age.
<b>CWT</b>	Estimates the genetic difference in carcass weight and is adjusted to 650 days of age.
<b>Fat Depth</b>	Bulls with negative (-) EBV's for this trait are expected to produce relatively leaner progeny than bulls with positive (+) EBV's.
<b>EMA</b>	Bulls with positive (+) EBV's for this trait are expected to produce more muscular progeny than bulls with negative (-) EBV's.
<b>Retail Beef Yield</b>	Bulls with larger EBV's are expected to produce progeny with higher yielding carcasses.
<b>Intramuscular Fat %</b>	Positive EBV's indicate likelihood of more intramuscular fat.
<b>Accuracies</b>	The accuracy provides a measure of the reliability of the EBV. The higher the value, the less likelihood of the EBV changing with the addition of more performance records on the animal.
<b>Selection Indexes</b>	An index ranks an animal for single production goal - profit. They take the hard work out of knowing how much emphasis to give each of the available growth, maternal, carcass and fertility EBV's when selecting parent animals. An index is a composite EBV of traits best suited to a particular production system and target market.

**Southern Self-Replacing Index:** Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing straight bred Hereford herd targeting the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 20 to 22 months of age to produce 300 kg carcasses with 10 mm P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

**Northern Self-Replacing Index:** Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting the domestic market. This index is suitable for use by both straight bred Hereford herds and in crossbreeding programs where Hereford bulls are being used over a *Bos indicus* based cow herd (e.g. flatback). Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 20 to 22 months of age to produce 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period.

**Southern Baldy Maternal Index:** Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over *Bos taurus* females (e.g. Angus). A portion of the heifers are retained for breeding and so maternal traits are of importance. The steers and surplus heifers are destined for slaughter at 20 to 22 months of age. Steers produce 300 kg carcasses with 10 mm of P8 fat depth, while heifers produce 270 kg carcasses with 12 mm of P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

**Northern Baldy Terminal Index:** Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd (e.g. flatback) using Hereford bulls over *Bos indicus*/Tropical females (e.g. Santa Gertrudis) where all progeny (male and female) are destined for slaughter. Steers and heifers are slaughtered at 20 to 22 months of age. Steers produce 340 kg carcasses with 14 mm of P8 fat depth while heifers produce 300 kg carcasses with 17 mm of P8 fat depth.

# AuctionsPlus

## How to Register and Bid on AuctionsPlus

1

Go to [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register at least 48 hours before the sale.

7

Fill in buyer details and once completed go back to Dashboard.

2

Select **"Sign Up"** in the top right hand corner.

8

Complete buyer induction module (approx. 30 minutes).

3

Fill out your name, mobile number, email address and create a password.

9

AuctionsPlus will email you to let you know that your account has been approved.

4

Go to your emails and confirm the account.

10

Log in on sale day and connect to auction.

5

Return to AuctionsPlus and log in.

11

Bid using the two-step process – unlock the bid button and bid at that price.

6

Select **"Dashboard"** and then select **"Request Approval to Buy"**.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Godfather N022 was used as a yearling and then sold at our sale to C & M Bateman at Furner for \$16,000. At that same sale 5 maternal brothers sold to average \$15,600. H31 replaces her grandmother Fancy U5 as our current most influential cow. We are continuing to use N022 by AI. He is already a trait leader for 200 day wt and scrotal size. He is also in the top 1% of the breed for short gestation length, EMA, IMF and all indexes. He has 6 sons on offer and we are retaining one - King Pin Q201.

# MISSING LEPTOSPIROSIS VACCINATIONS COULD LAY YOU OFF WORK FOR MONTHS

In addition to reducing the reproductive performance of beef and dairy herds, leptospirosis can spread from cattle to humans and develop into an ongoing chronic-fatigue-like illness

Don't risk your family, your employees, yourself or your herd. Vaccinate your cattle with Ultravac® 7in1\*, the only 7in1 that prevents shedding of leptospires, and can be used in calves from 4 weeks of age.

**Protection against leptospirosis and clostridial diseases**

FOR MORE INFORMATION, SPEAK TO YOUR LOCAL ZOEETIS REPRESENTATIVE OR CALL 1800 963 847

\*See product leaflet for details of administration and product claims.
