Post sale refreshments supplied by

TIPS TO REMEMBER ABOUT LAMBPLAN EBV'S:

1. For most commercial operations, BETTER GROWTH is vital. Rams must have + ve EBV's for weight.
2. The importance of Fat and Muscle EBV's depends on how the lambs will be sold and at what weight
 - for trade lambs sold in saleyards, Fat and Muscle not so important.
 - for heavier lambs sold via Value-based Marketing (contacts, grids etc), Fat and Muscle are very important.
3. Indexes are a guide – you must help the buyer or talk to your ram supplier to get the right EBV's
4. Every 1kg EBV for weight is worth 0.25-0.33kg extra carcass weight: \$125-\$150 extra over the life of a ram.
5. The 3 T's – Teeth, Testicles and Toes
 - Rams must have sound mouths, 2 functional, firm testicles and 4 clean, strong feet and toes.

TRAITS THAT DEFINE THE VALUE OF TERMINAL SIRES

The skills in selecting terminal sires for lamb production is to identify those sires that have desirable genes that produce lambs with high growth rate, low fat (lean) and better carcass conformation. At present, we cannot directly measure the genes of an animal. LAMBPLAN can however provide an estimate of the value of a sire's genes by looking at his own performance for certain traits and that of his relatives. This estimate is called an Estimate Breeding Value (EBV). For terminal sires there are three main traits to concentrate on these being:

1. Post weaning weight (PWWT) – describe the animal's genetic merit growth rate. A positive EBV means the animal's progeny will be genetically faster growing. That is they reach market weight at an earlier age.
2. Post weaning fat (PFAT) – describe the value of each animal's genes for fat depth at constant weight – a negative EBV means that an animal's progeny will be genetically leaner animal.
3. Post weaning eye muscle depth (PEMD) – describe the value of each animal's genes for eye muscle depth at constant weight – a positive EBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in higher-priced cuts.

IMPORTANT MESSAGE FOR SHEEP FARMERS

Campylobacter is reducing lamb marking percentages across Australia^{1,2}

Talk to your local Coopers[®] representative about strategies to help get more lambs on the ground this season

HISTORY OF ALLENDALE POLL DORSET STUD

In 1938 the late Mr Allen E Day founded the Allendale Dorset Horn stud and over the next 2 decades, regular infusions of top sires ensured a top quality flock was established. This was the base for the successful transformation into a Poll Dorset flock, commenced in 1956.

Allendale regularly displays progeny from its flock at major shows including the Adelaide and Melbourne Royal Shows. There have been numerous successes over its long and successful history, highlighted by the sale of Allendale's 'Aristocrat' for a world record Poll Dorset price of \$27,500 in 1983 at the Melbourne

Royal Show sale; a record that still stands.

Allendale offers over 100 Poll Dorset stud and flock rams, plus stud ewes at its annual combined sheep sale on the first Friday in October.

Lambplan was introduced in 1989.

The highest health standards are maintained, with the Allendale sheep flocks accredited Ovine Brucellosis free (No 2) and MN3v (S049-V) on the National Johnes MAP program.

MEMO OF POLL DORSET STUD SIRES

Allendale 181/16	Son of 198/13. Sire of the most stud rams in 2018.	Valma 576/07	Muscular AI ram. Sold for \$10,000.

Mornish 18/12 is the sire of 2 stud rams
and 1 stud ewe.

Mornish 18/12 sons have sold to a record \$14,000
and 11 have averaged \$6,380.

HISTORY OF ALLENDALE SUFFOLK STUD

Allendale Suffolk stud was established in 1931 by Allen E Day when he purchased top quality ewes at the dispersal of Mr H. C. Wright (Flock 35) and a further draft of ewes from Buckland Park.

Other major infusions were made from the famous Pembry and Stonehaven studs in the 1960s & 70s. At the Stonehaven dispersal in 1991 Graham and Alastair purchased some of Mr Shipp's best Ewes. In 2011 the majority of Sandra and Bill Harbison's Brechinridge Stud were purchased.

Many of our sires are from New Zealand. These include rams from the Punchbowl, Toi-Puke, Waterton, Dorie, Coleford, Waimotu and Brooklands Studs.

Allendale is now Australia's oldest Suffolk Stud joining 160 ewes.

Allendale Suffolk stud exhibits annually at Adelaide and Melbourne Royal Shows.

The Allendale Suffolk stud offers 15 stud and 50 flock rams plus 40 stud ewes at its annual sheep sale held on the first Friday in October.

Lambplan was introduced in 1989.

The highest health standards are maintained, with the Allendale sheep flocks accredited Ovine Brucellosis free (No 2) and MN3v (S049-V) on the National Johnes MAP program.

MEMO OF SUFFOLK STUD SIRES

Allendale 1830/16	Good carcase son of Mornish 18/12 NZ.	Allendale 10/06	Son of Coleford 429. Champion Ram @ Hamilton

DAYS WHITE SUFFOLK STUD - Flock No 736

Founded in 2009 with the transfer of White Suffolks from the Allendale Stud. The Allendale Stud was commenced in 1984 using the best Suffolk and Poll Dorset genetics available at that time. Over the years these infusions have continued along with the introduction of the best high performing White Suffolk genetics available. Stuctually sound, high performance genetics will be the aim of Days White Suffolks.

DAYS MATERNAL COMPOSITES FLOCK CM0017

Founded in 2010 we are making exciting progress with our maternal composite flock. We have endeavoured to combine the most suitable genetics to produce rams suitable to maintaining and progressing a self replacing flock.

We have sorced these genetics from

- the existing Maternal Composite database
- the Merino (dual purpose) database
- and our White Suffolk flock.

Please contact Lachy on 0428 521 630 if you would like any further information.
