Conditions apply – see page 4.

The vendors and or their agents do not give any warranty as to errors or omissions, if any, in these particulars which they believe to be accurate when compiled.

Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.

Welcome to our 2024 Bull Sale

A different welcome for a bull sale is hard to write every year because a lot doesn't change. Our quest to offer the most commercially relevant article with a high level of genetic merit remains the same year after year. Yes the genetics change as we continually source the best available sires and dams to add to our programmes- but the aim is still the same.

The running of the cow herds and preparation of the sale bulls may be slightly different season dependant but the principles are the same. Cows must be fertile, sound and productive. Their sons that we offer you have been comprehensively recorded, genomically tested, thoroughly vaccinated, vet checked and semen tested. That is something we pride ourselves on year after year.

Profitability may vary depending on prices and seasonal conditions but the effect of the right genetics on your herd are cumulative and long lasting so the genetic selections you make this season will affect your herd for years to come.

As always we look forward to seeing you at our sale or at our field days on 6th February. Videos will be available on our and auctions plus websites closer to sale day. Please contact us if you have any queries.

Regards,
Lachy and Alastair

Buyers Information

Inspection

All cattle will be available for inspection from 11.00am on the morning of the Sale, however inspection can be arranged before hand by appointment.

Luncheon

Will be available on the property.

Delivery

While every care will be taken, no responsibility can be accepted whilst awaiting delivery.

Transfers

Please indicate on the Buyers Instruction Slip if a transfer is required.

Health

All cattle are officially government confirmed as TB free and Brucellosis free. The properties have a J-Bas 6 status for Bovine Johnes disease. All sale cattle treated with 7 in 1 (booster due Autumn 2024). All sale cattle treated with Dectomax, January 2024. All sale bulls ear notch tested as NOT persistently infected with the BVDV virus. All bulls have been vaccinated with Pestiguard and Vibrovax.

Semen Retention

Days and Allendale reserve the right to in the future collect semen in any bull catalogued. This would be solely for within herd use and collected at the vendor's expense and purchaser's convenience.

Accommodation and Transport

The Auctioneers or vendors will be pleased to arrange accommodation in Adelaide or Bordertown.

Buying Orders

The Auctioneer's Stud Stock staff are well acquainted with the herd. Buying orders will be diligently executed by officers experienced in stud beef cattle practice.

Insurance

Can be arranged for transit and/or periods up to twelve (12) months cover.

Rebate

A rebate of four percent (4%) will be paid to outside agents in attendance. A rebate of one percent (1%) will be paid to outside agents not in attendance but introducing client in writing prior to sale.

BUYER'S INSTRUCTION SLIP - see Page 68

\$ INDEX	VALUE
SSR	+\$143
NSR	+\$130
SBM	+\$147
NBT	+\$108

Breedplan Explanation

EBV's are provided for the following traits:

CE DIR	Calving Ease Direct. Indicates how this animal influences the birth of its progeny. Positive EBV's indicate easier calving.
CE DTRS	Calving Ease Daughters. Indicates how well the animal produces daughters that have easier calving.
GL	Lower Gestation Length EBV's indicate easier calving and increased growth after birth.
SS	Scrotal size is an indicator of male fertility in regards to semen quality and quantity. SS is also positively associated with female fertility.
Birth Weight	The lower the birthweight EBV, the lighter is the birthweight potential of the progeny.
Genetic Milk	Reflects extra calf weight at weaning due to the genetic influence a sire has on his daughters milking and mothering ability.
200 Day Weight	Indicates the relative weight advantage of a sire at 8-10 months of age.
400 Day Weight	Indicates the relative weight advantage of a sire at yearling age.
600 Day Weight	The best single estimate of an animals genetic merit for growth beyond yearling age.
MWT	Mature Cow Weight is an estimate of the genetic difference in cow weight at 5 years of age.
CWT	Estimates the genetic difference in carcass weight and is adjusted to 650 days of age.
Fat Depth	Bulls with negative (-) EBV's for this trait are expected to produce relatively leaner progeny than bulls with positive (+) EBV's.
EMA	Bulls with positive (+) EBV's for this trait are expected to produce more muscular progeny than bulls with negative (-) EBV's.
Retail Beef Yield	Bulls with larger EBV's are expected to produce progeny with higher yielding carcasses.
Intramuscular Fat %	Positive EBV's indicate likelihood of more intramuscular fat.
Accuracies	The accuracy provides a measure of the reliability of the EBV. The higher the value, the less likelihood of the EBV changing with the addition of more performance records on the animal.
Selection Indexes	An index ranks an animal for single production goal - profit. They take the hard work out of knowing how much emphasis to give each of the available growth, maternal, carcass and fertility EBV's when selecting parent animals. An index is a composite EBV of traits best suited to a particular production system and target market.

Southern Self-Replacing Index: Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing straight bred Hereford herd targeting the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 20 to 22 months of age to produce 300 kg carcasses with 10 mm P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

Northern Self-Replacing Index: Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting the domestic market. This index is suitable for use by both straight bred Hereford herds and in crossbreeding programs where Hereford bulls are being used over a Bos indicus based cow herd (e.g. flatback). Daughters are retained for breeding and so maternal traits are of importance. Steers are slaughtered at 20 to 22 months of age to produce 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period.

Southern Baldy Maternal Index: Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over Bos taurus females (e.g. Angus). A portion of the heifers are retained for breeding and so maternal traits are of importance. The steers and surplus heifers are destined for slaughter at 20 to 22 months of age. Steers produce 300 kg carcasses with 10 mm of P8 fat depth, while heifers produce 270 kg carcasses with 12 mm of P8 fat depth. A moderate cost is applied for cow feed costs during the annual feed shortage period.

Northern Baldy Terminal Index: Estimates the genetic differences between animals in net profitability per cow joined in a commercial crossbred herd (e.g. flatback) using Hereford bulls over Bos indicus/Tropical females (e.g. Santa Gertrudis) where all progeny (male and female) are destined for slaughter. Steers and heifers are slaughtered at 20 to 22 months of age. Steers produce 340 kg carcasses with 14 mm of P8 fat depth while heifers produce 300 kg carcasses with 17 mm of P8 fat depth.

AuctionsPlus

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select **"Sign Up"** in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select **"Dashboard"** and then select **"Request Approval to Buy"**.
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

Godfather N022 was used as a yearling and then sold at our sale to C & M Bateman at Furner for \$16,000. At that same sale 5 maternal brothers sold to average \$15,600. Another maternal brother topped our sale in 2022 selling for \$52,000 to Yarram Park. H31 replaces her grandmother Fancy U5 as our current most influential cow. Godfather N022 is a trait leader for gestation length, IMF and scrotal size. He is also in the top 5% of the breed for EMA. His first sons sold to a top of \$40,000 to Talbalba Herefords. He has 10 sons on offer and 3 maternal brothers including lot 1.

Qabita Q198 was our pick of the autumn 2021 Wirruna offering. This long, level, correct bull was our choice to introduce the Techno bloodline to our herd. He is already a trait leader for gestation length and scrotal size. His EBV graph is impressive. We look forward to his first daughters calving in May. He is represented by six sons in the catalogue.

An impeccably bred, long well balanced sire with a good hindquarter that was used in the stud on cows in 2023. He has an outstanding data set culminating in top 5% on all indexes. A full brother topped our 2022 sale selling for \$52,000 to Yarram Park. Fancy H31 is our current most influential cow. Her eight sons have averaged \$22,000 and also include reference sire Godfather N022. Two full brothers sell as lots 16 & 39.

Don't let pestivirus rob you blind

Pestivirus is an insidious cattle disease.
It can take from you before you know it.

It causes significant reproductive and performance issues, and weakens immune systems – leading to other costly cattle health problems like respiratory disease. In fact it costs the industry over \$114m every year.^[1]

To protect your herd from pestivirus and optimise your returns,
it pays to be on Pestigard.

Find out how easy it is at your local rural reseller or cattle vet.
