CARCASE ADVANTAGE

EMA is in top 10% of breed

IMF is in top 5% of breed

2024 ANNUAL ON-PROPERTY BULL SALE
MONDAY FEBRUARY 19TH 2024

LOT 1

Days Whiteface Leading Carcase Data

Anyone interested in improving the carcase merit of their herd needs to seriously consider the 2024 Days Whiteface offering. By continually using sires with plenty of EMA and IMF Days Whiteface have "locked in" the cumulative gain that these selections allow. The 2024 offering is consistent in its carcase merit. Among these bulls are both calving ease, low birthweight, short gestation length sires and also the grunt bulls, those with plenty of growth.

Our consistent carcase performer Days Godfather N22 is again well represented. He is a trait leader for IMF and is in the top 5% for EMA. A son of his, the \$40,000 Days Kingswood Q139 adds plenty of power to the equation. His first son sold for \$102,000 for Talbalba last September. Kingswood is top 1%EMA, top 10% IMF and is a trait leader for 200,400 and 600 day wt. His sons definitely exhibit his strong carcase. Outcross sire Wirruna Qabita Q198 has a great performance profile highlighted by the fertility traits, scrotal size, and days to calving, top 5%IMF and top 10% 400 day wt.

The heifer options are led by the \$160,000 Injemira Robert Redford Q287 and include lots 5 and 6 both used in the stud. He is a trait leader for short gestation and low birthweight, still has plenty of growth and has the EMA and IMF figures that we emphasise in our breeding programme. Our other main heifer option is homebred sire Days King Pin Q201. He is also a trait leader for short gestation and low birthweight while being a trait leader for IMF.

This year as well as having our bulls on display on property on Tuesday 6th February, we will have a small display at the Casterton saleyards on Saturday 3rd February.

Any more information give Lachy a call on 0428521630

Days Fancy H31
