Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.

Welcome to our 2026 Bull Sale

On behalf of our family, we warmly welcome you to our 2026 Bull Sale and sincerely thank you for your continued interest and support.

We are mindful that the past season has been a challenging one for many producers, with drought, fire and floods impacting properties and communities across numerous regions. Our thoughts are with those that have been affected, and we acknowledge the resilience and determination shown by producers during these difficult times.

This year's offering represents the result of careful breeding, performance testing, and a strong focus on genetics that deliver fertility, structural soundness, growth, carcase, and long term profitability. We are proud of the quality and consistency of the bulls presented and confident they will add value to a wide range of breeding programs.

Whether you are a longstanding supporter or attending our sale for the first time, we appreciate the opportunity to show you our bulls.

They will be on display at our Field Days on Monday 9th February or by arrangement prior to the sale. Videos will be available on ours and Auctions Plus websites closer to sale day. We welcome your inspection and any questions about our bulls.

Kind Regards

Lachy and Lou, Alastair and Jayne

Buyers Information

Inspection

All cattle will be available for inspection from 10.00am on the morning of the Sale, however inspection can be arranged before hand by appointment.

Luncheon

Will be available on the property.

Delivery

While every care will be taken, no responsibility can be accepted whilst awaiting delivery.

Transfers

Please indicate on the Buyers Instruction Slip if a Herefords Australia transfer is required.

Health

All cattle are officially government confirmed as TB free and Brucellosis free. The properties have a J-Bas 6 status for Bovine Johnes disease. All sale cattle treated with 7 in 1 (booster due Autumn 2026). All sale cattle treated with Dectomax, January 2026. All sale bulls ear notch tested as NOT persistently infected with the BVDV virus. All bulls have been vaccinated with Pestiguard and Vibrovax.

Semen Retention

Days and Allendale reserve the right to in the future collect semen in any bull catalogued. This would be solely for within herd use and collected at the vendor's expense and purchaser's convenience.

Accommodation and Transport

The Auctioneers or vendors will be pleased to arrange accommodation in Adelaide or Bordertown.

Buying Orders

The Auctioneer's Stud Stock staff are well acquainted with the herd. Buying orders will be diligently executed by officers experienced in stud beef cattle practice.

Insurance

Can be arranged for transit and/or periods up to twelve (12) months cover.

Rebate

A rebate of four percent (4%) will be paid to outside agents in attendance. A rebate of one percent (1%) will be paid to outside agents not in attendance but introducing client in writing prior to sale.

BUYER'S INSTRUCTION SLIP - see Page 68

\$ INDEX VALUE	
Sustainability Production Index	\$154
MSA Production Index	\$142

Breedplan Explanation

EBV's are provided for the following traits:

CE DIR	Calving Ease Direct. Indicates how this animal influences the birth of its progeny. Positive EBV's indicate easier calving.
CE DTRS	Calving Ease Daughters. Indicates how well the animal produces daughters that have easier calving.
GL	Lower Gestation Length EBV's indicate easier calving and increased growth after birth.
SS	Scrotal size is an indicator of male fertility in regards to semen quality and quantity. SS is also positively associated with female fertility.
Birth Weight	The lower the birthweight EBV, the lighter is the birthweight potential of the progeny.
Genetic Milk	Reflects extra calf weight at weaning due to the genetic influence a sire has on his daughters milking and mothering ability.
200 Day Weight	Indicates the relative weight advantage of a sire at 8-10 months of age.
400 Day Weight	Indicates the relative weight advantage of a sire at yearling age.
600 Day Weight	The best single estimate of an animals genetic merit for growth beyond yearling age.
MWT	Mature Cow Weight is an estimate of the genetic difference in cow weight at 5 years of age.
CWT	Estimates the genetic difference in carcase weight and is adjusted to 650 days of age.
Fat Depth	Bulls with negative (-) EBV's for this trait are expected to produce relatively leaner progeny than bulls with positive (+) EBV's.
EMA	Bulls with positive (+) EBV's for this trait are expected to produce more muscular progeny than bulls with negative (-) EBV's.
Retail Beef Yield	Bulls with larger EBV's are expected to produce progeny with higher yielding carcasses.
Intramuscular Fat %	Positive EBV's indicate likelihood of more intramuscular fat.
Accuracies	The accuracy provides a measure of the reliability of the EBV. The higher the value, the less likelihood of the EBV changing with the addition of more performance records on the animal.
Selection Indexes	An index ranks an animal for single production goal - profit. They take the hard work out of knowing how much emphasis to give each of the available growth, maternal, carcase and fertility EBV's when selecting parent animals. An index is a composite EBV of traits best suited to a particular production system and target market.

Sustainability Production Index (\$): Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing Hereford herd targeting the domestic market and with a strong focus on sustainability. Daughters are retained for breeding, so maternal traits are of importance. Steers are finished on grass until 20 months of age to target 300 kg carcasses with 10 mm P8 fat depth.

MSA Production Index (\$): Estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting higher MSA grades in the domestic market. Daughters are retained for breeding and so maternal traits are of importance. Steers are grain finished until 20 of age to target 340 kg carcasses with 12 mm P8 fat depth. A high cost is applied for cow feed costs during the annual feed shortage period which produces little change in mature cow weight.

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

7

Fill in buyer details and once completed go back to Dashboard.

2

Select **"Sign Up"** in the top right hand corner.

8

Complete buyer induction module (approx. 30 minutes).

3

Fill out your name, mobile number, email address and create a password.

9

AuctionsPlus will email you to let you know that your account has been approved.

4

Go to your emails and confirm the account.

10

Log in on sale day and connect to auction.

5

Return to AuctionsPlus and log in.

11

Bid using the two-step process – unlock the bid button and bid at that price.

6

Select **"Dashboard"** and then select **"Request Approval to Buy"**.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

We purchased Southern Cross in 2022 for a record Hereford Yearling bull price of \$91,000. He has been used extensively with great results really putting a type on his progeny. He has a unique data set being a trait leader for low birthweight and also 200, 400 & 600 day wt as well as IMF. He also has top 1% indexes. He has a huge representation in the sale with 25 sons on offer.

These will be our second group of sons by Outcross sire SHF Houston. Houston appealed to us for his terrific carcass and length of body. He has put some weight into his progeny being a trait leader for 200, 400 & 600 day wt as well as gestation length and scrotal size. He is also top 1% for EMA, Carcass wt, yield and both indexes. He has 3 sons on offer.

We decided to use Steakout because of his great structure, moderate maturity pattern, slick skin, doing ability and great EBV profile. He is a trait leader for birth weight, scrotal size and IMF. He is also top 1% for both indexes. He has three sons in the catalogue including two used in the stud. His sire Querido Q266 also has three sons in the catalogue.

Don't let pestivirus rob you blind

**Pestivirus is an insidious cattle disease.
It can take from you before you know it.**

It causes significant reproductive and performance issues, and weakens immune systems – leading to other costly cattle health problems like respiratory disease. In fact it costs the industry over \$114m every year.^[1]

To protect your herd from pestivirus and optimise your returns, it pays to be on Pestigard.

Find out how easy it is at your local rural reseller or cattle vet.
